PROJECTS

[Portfolio web-site](#)

This project is a portfolio web-site. In the project you will have information about me.
Project will present to you some of the projects I have prepared.
The project was prepared in React!

[Blog Web-site](#)

A blog project can accept users, users can open a personal account and post,
delete it.Newly posted posts are made visible on the main page.
The project was prepared in React!

[Clothings Shop web-site](#)

Clothings Shop Project! Created for the convenience of both seller and buyer. In this case, the buyer can find seasonal,
latest fashion clothes for all family members in any size, the website itself serves to the extent that the customer is satisfied.
The store owner simply accepts payment online.
The project was prepared in React!
